AddCrete BWA

Water resisting material according EN 934-2 T9

Application area

AddCrete BWA is high performance admixture for subsequent protection of concrete surface

The best performance offers following advantages for standard High performance concrete, self-compacting-concrete and fair faced concrete:

- Improving of the water resistance
- Additional protection of the concrete surface

Technical data

AddCrete BWA

Density kg/dm ³	ca.0,9
State / Colour	liquid / white
Max. Cl content	% mass <0,10
Max.alkali content	% mass <1,0
Certificate of Factory Control	Centre for Testing and European Certification No.: 1871-CPR-0298
Package	IBC containers 1000 kg, canister..

*Can be stored 12 months in tight closed containers at temperature from +5 °C to +45 °C.
